3698 State Route 13/127		
Pinckneyville, Illinois 62274		

Approved by: _____
County Engineer Date

Payment Received: _____ Date: _____

51 General Requirments:

52
53 **This permit when authorized grants permission to the Hauler to use the County roads listed on the IDOT**
54 **Permit noted. The Hauler is liable and the County is NOT liable for any damage caused to any County**
55 **roads as a result of moving the permitted load noted on the IDOT Permit.**

56
57 The permit is granted only with the understanding that the vehicle is properly licensed, for moves in daylight
58 hours only, that all necessary safety measures will be taken, and the Hauler shall assume all responsibility for
59 accidents or damages that may occur to persons or property either public or private, caused directly or indirectly
60 by reason of the transportation of vehicles or objects under this permit.

61
62 The Hauler represents all parties' interest and shall furnish material, do all work, pay all costs and shall in a
63 reasonable length of time restore the damaged portions of the highway or right of way to a condition similar or
64 equal to that existing condition before the damage. All movements shall be performed at the Hauler' risk and
65 expense.

66
67 This permit covers the IDOT Permit noted. Future IDOT Permits will require a new County permit.

68
69 This permit is effective only insofar as the County has jurisdiction and does not presume to release the Hauler
70 from compliance with the provisions of existing statutes or local regulations.

71
72 Permit expires when the IDOT Permit expires.

73
74 Notification shall be given to the County prior to the move.

75
76 Trucking Standards:

77
78 A copy of this permit shall be kept with the permitted load at all times.

79
80 The Hauler shall not cut, trim, molest or remove any trees, shrubs or plants growing upon the highway without
81 the approval of the County Engineer or his duly authorized representative.

82
83 Traffic Control:

84
85 The Hauler shall at all times conduct movements in such a manner as to minimize hazards to vehicular and
86 pedestrian traffic. Whenever traffic is obstructed or a hazard to the free flow of traffic in the normal traffic
87 lanes is proposed, plans for the proposed method of traffic control must be submitted to and approved by the
88 County at least 72 hours, and preferably longer, before the start of work.

89
90 All traffic control shall be in accordance with the Manual of Uniform Traffic Control Devices hereinafter
91 known as MUTCD and amendments thereof. It should be noted that standards and typical placement of devices
92 shown in the MUTCD are minimums. Many locations may require additional or supplemental devices. All
93 signs, barricades, flaggers, etc., required for traffic control shall be furnished by the Hauler.

94
95 Failure to provide these devices shall be just reason for the County to cancel this permit until which time the
96 above devices are properly erected and maintained.

97
98 One-way traffic shall be maintained at all times. Exception to the foregoing statement would be the temporary
99 moving of trucks in and out of the area; then proper warnings to the traveling public shall be given. The Hauler
100 shall furnish all flagmen, signs, and barricades to protect traffic.
